LETTER OF RECOMMENDATION

With this letter, KAZ GREEN ENERGY LLP, part of the Fuel and Energy Division of Kazakhmys Holding LLP, expresses sincere respect and gratitude to TechnoGroupService LLP (TGS), which has established itself as a highly professional and reliable partner. The distinctive features of the TGS team are professionalism, efficiency and high organization.

Cooperation with TGS was especially significant and productive in the framework of our joint projects, such as the construction of the 10 MW solar power plant "Kengir" SPP commissioned in December 2019, and the 50 MW solar power plant "Balkhash" commissioned on 07/01/2022.

TGS's implementation of these solar power projects as an EPC-contractor highlights not only their ability to successfully solve complex problems, but also their dedication to high quality standards. Over the past period, the plants operated as normal and provided electricity generation above planned volumes, which indicates the efficiency of TGS, technical competence and a careful approach to projects.

We are pleased to recommend «TechnoGroupService» LLP as a reliable and professional partner in the field of renewable energy sources. TGS demonstrates not only outstanding technical skills, but also a strong commitment to sustainable regional development. We also look forward to continuing our mutually beneficial cooperation in the future.

Best wishes,

General director

V.B. Sibagatulin
